

CUSTOMER INFORMATION

RECO DRUMS

GENTLE ON ENVIRONMENT
AND RESOURCES

200 L AND 60 L DRUMS IN TOP QUALITY

Not only the lubricants but also the logistics and the product design is steadily improved at Oest. Our sales partners also benefit from the change to new 200 liter and 60 liter drums with Oest branding for numerous product groups.

- ▶ **A new, modern design represents high quality standards**
- ▶ **A high recognition value increases the publicity and image**
- ▶ **A stronger market presence to the final customer**
- ▶ **A high identification with the product**
- ▶ **An immediate visible and high degree of transparency towards the manufacturer**

THE OEST RECO DRUM ENVIRONMENTALLY FRIENDLY AND GENTLE ON RESOURCES

For some product groups, we will use reconditioned drums in the same design but without the Oest lettering. These RECO drums are especially conditioned and are therefore reusable. Besides the advantages in costs of which our customers benefit, our RECO drums are particularly environmentally friendly and gentle on resources. Possible smaller disfigurements at the drums are accepted on purpose. For the environment!

- ▶ **Gentle on resources and environmentally friendly**
- ▶ **Each RECO drum saves up to 120 kgs CO₂**
- ▶ **No derogation of the lubricant quality**
- ▶ **Certified safety, reliability and functionality of the drums**

Our new RECO drums are marked with a sticker and are thereby immediately distinguishable.
